### Matrimonial Services

“We are proud to introduce a matrimonial service which takes pride in our religious values and multicultural diversity in connecting individuals and families to one another in search of a spouse.

In partnership with our community, we have ventured onto this platform that matches the needs/wants of an individual electronically. Our online platform then filters other candidates through compatibility to facilitate a start of an amazing journey. We have various events to follow!

This is completely a free service. We have taken the stress, financial and social out of the equation to ensure an environment which is most conducive to connecting families in a religious and culturally sensitive manner.
